

Sheehy Elementary

Issue (*average at grade A schools*)

Inexperienced teachers (<i>A schools: 11%</i>)	33%
Time with substitutes (<i>4%</i>)	8%
Zoned students choosing another school (<i>19%</i>)	42%
Chronically absent (<i>17%</i>)	45%
Economically disadvantaged (<i>40%</i>)	100%

Notes: D- and F-rated schools are compared to A schools of the same grade level. "Inexperienced teachers" have less than four years of teaching experience or hold a temporary teaching certificate. The time with a substitute teacher is calculated as the total hours taught by a Kelly Substitutes educator divided by the estimated total number of teacher-hours, assuming a 180-day school year at 8 hours per day. The share of zoned students choosing another school does not include private school or homeschooled students. Students are "chronically absent" after missing 10% or more of school days in a year. Economically disadvantaged students is the adjusted share of students qualifying for free or reduced-price lunch.
